Profile

Design engineer working at the intersection of design and code. I design and build fully custom web experiences end to end, from first Figma frame to production build, with an AI-augmented workflow (Cursor, Claude Code) at the core of how I ship. Recent work for Nestlé, Lilly, LG, Chanel and Gore.

OLEUS    LIBERTY GLOBAL CHANEL

Selected Work

OLEUS · Nestlé oleus.com

Fully custom Shopify theme for Nestlé’s OLEUS brand. Sole developer: brand and UI in Figma, theme code in Liquid and JavaScript. A scalable component build: reusable, configurable sections let the team launch new pages on brand without developer input. Stakeholder management across a global team.

113spring 113spring.com

Custom Shopify theme for a corporate-backed retail brand, developed solo from scratch on the same scalable component system: pre-built, configurable sections keep the site on brand as the team scales pages and campaigns. Launched July 2026.

Experience

Venture Designer & Developer · Bundl Jan 2025 – Present · Antwerp, BE

- / Sole developer on two production Shopify storefronts (oleus.com, 113spring.com), owning everything from Figma design systems to custom theme code.
- / Built MVPs and prototypes to validate new ventures for enterprise clients, including gore-textkidswear.com for Gore.
- / Translated venture strategy into visual narratives and GTM assets for Lilly and Liberty Global, aligning large stakeholder groups.

Technical Staff · CCM Jun 2020 – Aug 2022 · Mechelen, BE

Stack

DEVELOPMENT	DESIGN	AI / WORKFLOWS
